DISCLAIMER

This whitepaper is intended to supply information about Chibi Neko to participants. Participants should read the white paper and the official website carefully and have a good understanding of blockchain technology and digital assets before making a purchase.

Before making any decisions, please be informed of the potential risks and examine your risk tolerance and financial position.

This whitepapers material is offered primarily for general comprehension. This paper is for discussion and presentation purposes only. The suggested blockchain platform "Chibi Neko" does not guarantee the correctness of the results achieved in this whitepaper.

This whitepaper is not a prospectus nor an investment solicitation, and it does not influence any offering or solicitation of an offer to buy or sell securities in any country. This document was not generated by and is not subject to, any laws or regulations in any nation intended at safeguarding investors.

CRYPTOCURRENCY

Cryptocurrency is a digital currency in which transactions are verified and records maintained by a decentralized system using cryptography and can be exchanged for online goods and services. Many companies have issued their own cryptocurrencies, often called tokens, and these can be traded specifically for the good or service that the company provides. Think of them as you would create arcade tokens or casino chips. You'll need to exchange real currency for the cryptocurrency to access the good or service.

Cryptocurrencies work using a technology called blockchain. Blockchain is a decentralized technology spread across many computers that manages and records transactions. Part of the appeal of this technology is its security.

BINANCE SMART CHAIN

Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain. Unlike Binance Chain, BSC boasts smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The design goal here was to leave the high throughput of Binance Chain intact while introducing smart contracts into its ecosystem.

In essence, both blockchains operate side-by-side. It's worth noting that BSC isn't a so-called layer two or off-chain scalability solution. It's an independent blockchain that could run even if Binance Chain went offline. That said, both chains bear a strong resemblance from a design standpoint.

Because BSC is EVM-compatible, it launched with support for the rich universe of Ethereum tools and decentralized apps (DApps). In theory, this makes it easy for developers to port their projects over from Ethereum. For users, it means that applications like MetaMask can be easily configured to work with BSC. Seriously – it's just a matter of tweaking a couple of settings. Check out 'Use MetaMask for Binance Smart Chain' to get started.

ABOUT CHIBI NEKO

Ever since Chibi was little he had a dream. When he looked at the moon he said to himself 'that's where I want to be'. He made a plan how he would go and set off to the moon creating a city with it's own ecosystem.

That's why \$CHIB token has come to life. With our token we want to accomplish the dream of building a city on the moon.

To do all this we will need the support of all our holders and future holders. Since Chibi want to thank them he will reward them with a 3% rewards for all holders on each buy and sell.

There will also be a possibility to stake your \$CHIB tokens. By doing this U can earn passive income. The longer you stake the more you will earn.

CHIBI CITY

It's end 2021 and gaming and non-fungible tokens (NFTs) are taking over the blockchain by storm. We created this great idea to make our own play-2-earn game. We told you how Chibi wanted to create his own ecosystem on the moon and now it's our turn to bring this idea to life.

In the first quarter of 2022 we will bring our first unique NFTs to the blockchain. These NFTs can be later used in the game. The game will be all about building and crafting.

We can tell you that the more NFTs u gather the more rewards you can get. These NFTs can grant special perks in the game.

TOKENOMICS

Total Supply

1.000.000.000.000

Private sale

60.000.000.000

Pre-sale

400.000.000.000

Liquidity

200.000.000.000

Marketing & Give aways

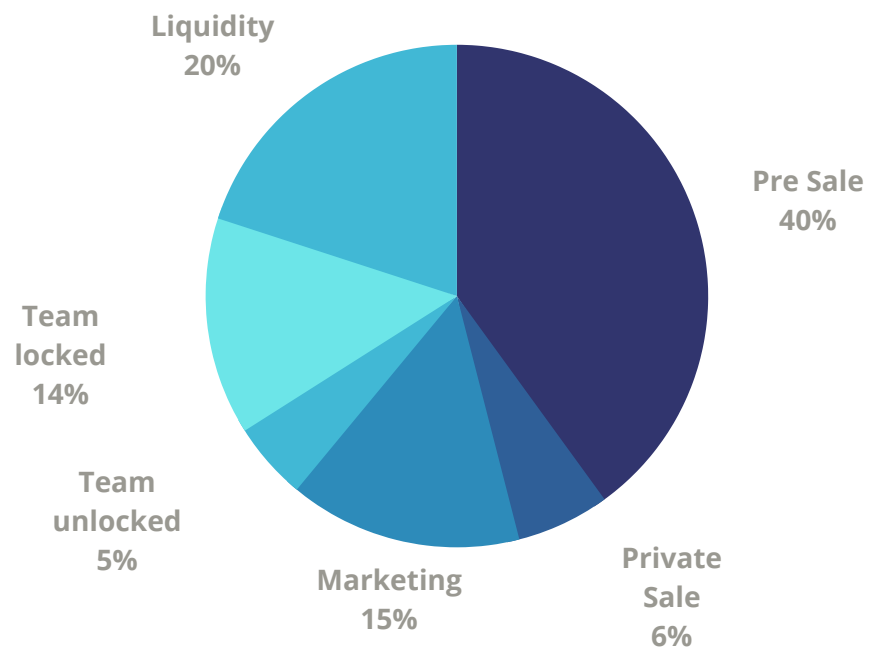

150.000.000.000

Team unlocked

50.000.000.000

Team locked (1 year)

140.000.000.000

BUY & SELL TAX

4% Marketing & Buyback

To help our token create more public awareness there will be a small fee that will go to our marketing pool. This will be used for Influencers, Youtubers, TikTokkers and marketing companies.

3% Rewards to all holders

With rewards going back to our holders it's always better to hold \$CHIB. Each transaction that is made will make a token holder gain extra tokens as a reward for holding \$CHIB.

3% Liquidity

We want to maintain a healthy liquidity balance on PancakeSwap (PCS). That's why 3% will return to the liquidity pool. The liquidity is locked.

PRE-SALE

To create a healthy token we will start off with a pre-sale. This will also benefit our very first supporters since they will be able to buy \$CHIB token at a fixed price.

Our pre-sale will be launched on Pinksale. They are very well known for their launchpad for new projects and fit our needs.

Tokens reserved for pre-sale

400.000.000.000

Softcap

250 BNB

Hardcap

500 BNB

Min BNB

0.1

Max BNB
